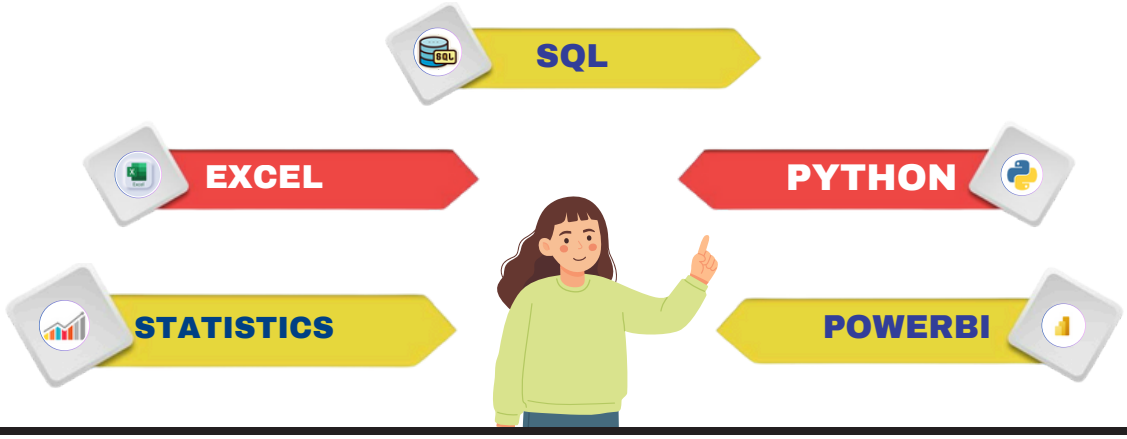
Tools used in Data Analytics



EXCEL

- Excel Basics & Cell Referencing
- Data Cleaning & Validation
- Formatting & Layout
- Sorting & Filtering
- Essential Excel Functions
- Date, Text, Time & Error Handling Functions
- Aggregate Methods
- Data Analysis Tools
- Pivot Tables & Pivot Charts
- Data Visualization & Dynamic Charts
- Interactive Dashboard with slices and timeline
- Advanced Excel Tools

STATISTICS

- Mean, Median, Mode
- Range
- Standard Deviation
- Percentiles
- Quartiles
- Skewness
- Basic Probability Concepts
- Conditional Probability
- Normal Distribution
- Z-score
- Types of Sampling
- Hypothesis Testing
- Correlation vs Covariance
- Sampling methods
- Anova
- Chi square
- Random Variables and Distribution

SQL (MYSQL)

- RDBMS Concepts & MySQL Setup
- Database & Table Creation with Data Types
- SELECT Queries, Filters & Operators
- SQL commands - DDL, DML(Alter, Modify, Drop, Insert, Delete)
- Constraints(Primary Keys, Foreign Keys, Null, Unique, Check)
- Functions: String, Date, Numeric & Conversion
- GROUP BY, HAVING & Aggregate Functions
- Joins & Subqueries
- Windows Function
- Normalisation

PYTHON BASICS

- Introduction
- Data Types
- Conditional Statement
- Function & Loop
- File Handling
- Introduction to Python Jupyter
- Python libraries

Numpy

- Slicing and Arithemetic concepts

Pandas

- Dataframes and series
- Data Aggregations and grouping
- Importing and Exporting Datas

Matplotlib/Seaborn

- Static Graphs and charts

POWERBI

- Power BI Interface
- Connecting to various Databases
- Data Import
- Data Cleaning with Power Query
- Data Modeling
- Data Visualisation
- Filters and Slices
- Bookmarks, Selection
- Button concepts/Page navigation
- DAX Calculations
- Visualizations
- Advanced Features
- Publishing, Workspaces & Dashboards
- Collaboration
- Exporting Methods
